

Analysis of Arkansas Yearly Tornado Numbers

For my data analysis project, I found data from the Times Record Tornado Archive, detailing the number of tornados experienced by the state of Arkansas every year from 1950 to 2022.

Figure 1: A line graph showing the trend of tornados that occurred every year from 1950 to 2022 in Arkansas. According to the graph, while there are outliers, there is a slight upward trend, suggesting the rate of tornados in the state has increased through the years.
